

## Introducing Tinder Lite

**UPDATE: Tinder Lite is available to all members worldwide on iOS devices and Android 4.4 - 5.1.**

We're officially turning the Lite on.

Starting today, users in Singapore can download Tinder Lite: the smallest (taking up 25x less space on your phone), fastest (25 percent speedier, btw) and most cost-effective (reducing data use by 20 percent) Tinder experience ever.

Even with these impressive changes under the hood, Tinder Lite is still the Tinder you've grown to love. You can discover new people around you, Like or Nope profiles and chat with matches who Like you, too. More good news: you only need one Tinder account to use both the Tinder and Tinder Lite apps. Just choose which experience you prefer based on their network conditions. And if you're a Tinder Plus/Gold subscriber, you'll also be able to access your premium upgrades using Tinder Lite, too.

Tinder Lite can be downloaded from the Google Play Store in Vietnam [here](#).

Additional information about Tinder Lite be found [here](#). Stay tuned for more updates.
